

Equine Health Schedules

Recommended Healthcare for Horses

At Moore Veterinary Clinic, we care about your horses and want to help keep them healthy and protected from dangerous and contagious diseases. Core vaccinations protect against diseases that are endemic to a region, are virulent/highly contagious, pose a risk of severe disease, those having potential public health significance, and/or are required by law. Core vaccines have clearly demonstrable efficacy and safety, with a high enough level of patient benefit and low enough level of risk to justify their use in all horses. We also offer specific vaccines that your horse may benefit from depending on the environment and lifestyle they live. ALL vaccination programs should be developed in consultation with a licensed veterinarian.

ADULT HORSES:

Vaccine	Schedule	Notes
Rabies	Annual	
VEWT	Annual	Ideally given in spring, prior to onset of vector season.
West Nile Virus	Semi-Annual	Ideally given in spring, prior to onset of vector season.
Flu/Rhino	Semi-Annual	
Strangles	Annual	

FOALS:

Vaccine	Schedule
